## EDUCATION

|                                                                                                      |                |
|------------------------------------------------------------------------------------------------------|----------------|
| <b>NEW YORK UNIVERSITY, TANDON SCHOOL OF ENGINEERING</b> , Brooklyn, NY                              | Expected 05/27 |
| Master of Science in Financial Engineering   GPA: 3.8/4.0                                            |                |
| Graduate Teaching Assistant: Financial Economics; C++ Financial Software Laboratory; Value Investing |                |
| <b>SVKM'S NMIMS, SCHOOL OF BUSINESS MANAGEMENT</b> , Mumbai, India                                   | 04/22          |
| Master of Business Administration, Concentration in Finance   GPA: 3.3/4.0                           |                |
| <b>VELLORE INSTITUTE OF TECHNOLOGY</b> , Vellore, India                                              | 06/20          |
| Bachelor of Technology in Mechanical Engineering   GPA: 8.9/10.0                                     |                |

## PROGRAMMING / TECHNICAL SKILLS / CERTIFICATIONS

**Programming:** C/C++ (C++20, STL, Boost), Python, SQL, Bash, LaTeX/Typst  
**Libraries & Frameworks:** NumPy, Pandas, Polars, SciPy, scikit-learn, statsmodels, LightGBM, XGBoost, PyTorch, pytest  
**Data & Tools:** Linux/Unix, Git, CMake, Streamlit, Shiny, Excel, Bloomberg Terminal, Tableau, Power BI  
**Certifications:** CFA Level I; C++ Programming for Financial Engineering (Baruch College); Bloomberg Market Concepts; CFI FMVA

## COURSEWORK HIGHLIGHTS

**Quantitative Methods & Computing:** Financial Econometrics, Machine Learning in Financial Engineering, Quantitative Methods in Finance, Financial Computing, Applied Numerical Methods, Data Structures and Algorithms  
**Risk, Valuation & Derivatives:** Financial Risk Management, Valuation for Financial Engineering, Quantitative Portfolio Management, Options Pricing & Stochastic Calculus, Fixed Income Securities and Interest Rate Derivatives

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |               |
